PROJECTS

Student Management System C++
Mini Project

- Student management system as the name indicates will be used managing students records will be used for various purposes. Accepting correct data will results in generating the desired output in correct format without any delay.

STUDENT COURSE REGISTRATION
Major Project , USING SPRING BOOT, MySQL, REACT JS

- This system will maintain a subject registration database which will allow the student to view the subject details, to register the subject and select the subject. The students enter details and choice of selecting the subject while going to manual method it is vary easy. So this system uses several programming and database techniques to work involved in this process. This is a web application developed by using REACT JS, SPRING BOOT MySQL.

COMPUTER LANGUAGES

C/C++ LANGUAGE
OBJECT ORIENTED PROGRAMMING SYSTEM
